# Classification (REGULATION (EC) No 1272/2008) as amended by GB-CLP Regulation, UK SI 2019/720, and UK SI 2020/1567)

Flammable liquids, Category 2	H225: Highly flammable liquid and vapour.
Skin irritation, Category 2	H315: Causes skin irritation.
Eye irritation, Category 2	H319: Causes serious eye irritation.
Specific target organ toxicity - single ex- posure, Category 3, Central nervous system	H336: May cause drowsiness or dizziness.

#### 5.2 Special hazards arising from the substance or mixture

Specific hazards during fire- : No further relevant information available. fighting

#### 5.3 Advice for firefighters

Special protective equipment for firefighters	:	No special protective measures against fire required.
Further information	:	In the event of fire, wear self-contained breathing apparatus. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. Collect contaminated fire extinguishing water separately. This must not be discharged into drains.

### **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

Persona	l precautions	:	Remove all sources of ignition. Use personal protective equipment. Use breathing protection against the effects of fumes/dust/aerosol. Evacuate personnel to safe areas. Ensure adequate ventilation.
			Linsule adequate ventilation.

#### 6.2 Environmental precautions

Environmental precautions	:	The product should not be allowed to enter drains, water courses or the soil. Prevent the material from reaching sewage system, holes and cellars. If the product contaminates rivers and lakes or drains inform respective authorities.

#### 6.4 Reference to other sections

Refer to protective measures listed in sections 7 and 8., For disposal considerations see section 13.

### **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

Advice on safe handling :	Avoid formation of dust and aerosols. Use only with adequate ventilation. Take note of emission threshold. Use solvent-proof equipment. Ensure that suitable extractors are available on processing machines. Handle with care. Keep eye wash bottle available on working place. Avoid release to the environment. Keep away from children.
Advice on protection against : fire and explosion	Keep product and empty container away from heat and sources of ignition. Do not smoke. Take measures to prevent the build up of electrostatic charge. May form explosive mix- tures in air. Highly volatile, flammable constituents are re- leased during processing. In the event of fire and/or explosion do not breathe fumes. Keep breathing equipment ready. Have fire extinguishing equipment ready in case of nearby fire.
7.2 Conditions for safe storage, inc	cluding any incompatibilities
Requirements for storage : areas and containers	Keep dark, cool and dry. Store in cool place.
Further information on stor- :	Keep containers tightly closed in a dry, cool and well-

Remarks

 The glove material has to be impermeable and resistant to the product/the substance/the preparation.
 The exact break through time can be obtained from the protective glove producer and this has to be observed.
 The gloves need to be disposed after the penetration time and replaced by new ones.
 Apply skin protectant before working with gloves to avoid skin swellings and use a skin cleansing and skincare product after the work.
